EDUCATION

Bachelor of Engineering - Computer Science

07/2021 – 05/2025

Coimbatore Institute of Technology

CGPA - 8.53

SKILLS

Languages: Python, Java, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Django, Tailwind CSS

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3), GCP (Compute Engine, BigQuery, Cloud Storage), Nginx, Certbot

Tools: Git, GitHub, VS Code, Anaconda

EXPERIENCE

Member Technical Staff

04/2026 – Present

Zoho Corporation

- Working in Finance domain with the Zoho Payroll product which is used by organizations powering their employee payments in digital experience.

Associate Technical Support Engineer

07/2025 – 04/2026

Salesforce (formerly Informatica)

- Engineered code stability improvements by converting over **10 recurring production incidents** into refactored code, significantly reducing long-term bug recurrence.
- Optimized issue resolution pipelines in collaboration with technical and CRM stakeholders, leading to a **20% reduction in critical functional flaws** and demonstrably enhancing overall product stability.

GCS Intern

01/2025 – 07/2025

Informatica

- Learned about Data Management and tools like **Product 360** to manage Product Information along with **ActiveVOS** for process automation.
- Developed **Python-based terminal application** ([link](#)) to apply Emergency Bug Fixes (EBFs) for Product 360 reducing **90% of process time**.

PROJECTS

DressUp | [Link](#)

MERN Stack, Vite, Tailwind CSS, Gemini API, MongoDB, AWS EC2

- Architected a **cloud-hosted outfit recommendation platform** using MERN stack and deployed on AWS EC2 with Nginx reverse proxy + HTTPS.
- Integrated **Gemini API for color extraction** from up to 10 uploaded images, automating color-matching logic and reducing API latency by 40%.

MFlix | [Link](#)

HTML5, Tailwind CSS, React JS, Vite, Browser's LS

- Developed a responsive movie-browsing web app displaying real-time content from Trending and Top-Rated categories using React.js.
- Engineered advanced dual filtering capabilities (search and genre-based) for user watchlists, reducing the average content search time for users by 50%.
- Improved application responsiveness by 25% by implementing efficient TMDB API integration and strategically utilizing the Browser's Local Storage for fast data caching and retrieval.

Digi Attend | [Link](#)

HTML5, CSS3, JavaScript, Django, Python, MySQL

- Built and deployed a full-featured Django/MySQL system that manages **attendance data and leave applications** for 2 distinct academic communities with modular approach.
- Integrated **authentication and role-based access control** with Django ORM to enhance system security.
- Crafted **role-based UI** using **Bootstrap v4**, improving accessibility and streamlining user workflows.
